

First Brokerage Event

16-6-16, Breda

<http://www.biolinx-project.eu/>

Raimo van der Linden, chairman of event
& Dennis van der Pas, coordinator of BioLinX project

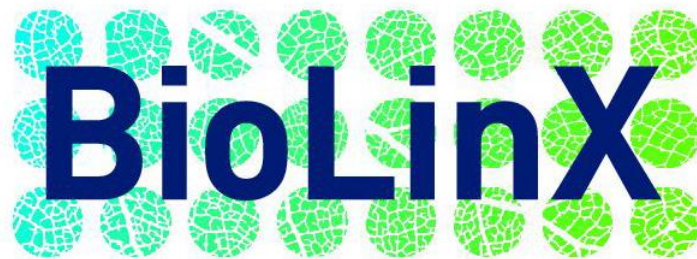

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 652692

Program

Time	Subject
09.30-09.45	Welcome, short intro on day & BioLinX
09.45-10.30	10-minute pitches
10.30-10.55	Keynote: Fraunhofer (DE)
10.55-11.25	Break
11.25-11.50	Keynote: Synpo (CZ)
11.50-12.30	10-minutes pitches
12.30-13.30	Lunch break
13.30-14.00	Central kick-off of the afternoon
14.00-15.15	Case studies (3 parallel sessions)
15.15-15.45	Break
15.45-17.00	Case studies (3 parallel sessions)
17.00-17.30	Plenary: summary of sessions / discussion
17.30	Network drinks
18.00	End

First Brokerage Event

About BioLinX

Supporting the innovation owner

- **Scout:** FP7 & H2020 funded projects
- **Screen:** identify the innovations in the project
- **Select:** innovation owners and kind of support

- **Increase TRL**
- **Decrease time to market**

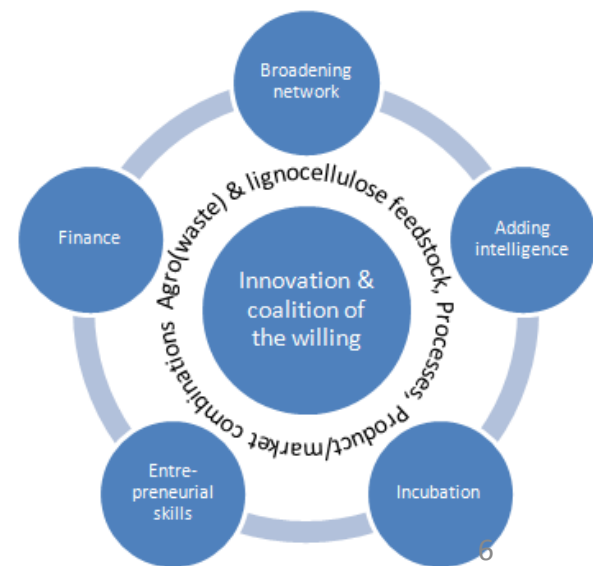

Upcoming events - 2016

- **Brokerage:** as part of the Italian Forum on Industrial Biotechnology and Bioeconomy, 22-23 September 2016, Vicenza, Italy
- **Brokerage & Finance:** Biobased Delta Business Development Days, 28-29 September 2016, Breda, Netherlands
- **Brokerage:** The 7th Workshop on Cellulose, 15-16 November, Örnsköldsvik, Sweden

BioLinX – take home messages

1. **Mission:** Increase TRL & decrease time to market
2. **Focus:** agro and forest-based as a feedstock or related processes / product-to-market
3. **Starting point:** European projects as ecosystem for innovation
4. **Joint effort:** you stay owner of the innovation, we provide a process to support you
5. **Active engagement & input:** is the only requirement to participate
6. **Strong network:** by adding intelligence, partner database and relevant regions
7. **Experienced partners:** BiolinX brings together very experienced partners in collaboration, incubation & support
8. **Finance:** link to both Public and Private financing
9. **Free of charge:** BioLinX is funded by the European Commission

16-6-2016

BioLinX Brokerage Event

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 652692

BioLinX partners – a network of expertise

(Alphabetic order)

DECHEMA (Society for Chemical Engineering and Biotechnology) brings together experts from a wide range of disciplines, institutions and generations to stimulate scientific exchange in chemical engineering, process engineering and biotechnology. DECHEMA facilitates the transfer of research results into industrial applications. Being very experienced in organizing partnering events (both physical and online) DECHEMA's main tasks will be to set up the partnering platform and to co-organize the regional events.

Lead for Partnering database; co-organizing physical and on-line meetings

Europe Unlimited (eUnlimited) provides event and online matching platforms between emerging innovative companies, investors and partners across Europe. They link entrepreneurial companies in many venture fora and partnering events to venture capital and corporate investors and improve the investor-readiness of companies. In BioLinX eUnlimited will lead the workshops on Business development and finance, contribute to the assessment of the projects and contribute to the dissemination of the project results

Lead for business support program; organizing Private funding events

INNEN is focused on the design and development of advanced IT solution to search, access and manage relevant knowledge within enterprises, with specific focus on the Technology Innovation domain. Innovation Engineering will integrate information from several heterogeneous sources and will provide the search engine features, covering scientific publications, patents and ongoing public-funded innovation projects. Within BioLinX they will realize the Intelligence platform

Lead for Intelligence platform

PNO is involved as advisor in various PPP roadmap development. They have a strong focus on industrial biotech and develop European networking and incubator projects with various smart specialization regions. Within BioLinX they will use their real life experience to assess the EU funded projects, support the analysis of the regions, support the regional workshops and will implement the advising on public funding opportunities and the proven incubation process.

Lead for Incubation process; organizing Public funding events

REWIn is involved in (trans)national and (trans)regional cooperation projects, Smart Specialization Strategy, regional analysis and the bioeconomy. REWIn supports the Triple Helix partners in the Biobased Economy and operates various SME driven development programs. Within BioLinX REWIn is responsible for the coordination and communication/dissemination, is involved in the assessments of EU-funded projects, the regional assessments as well as the regional workshops.

Coordinator; Lead for Communication; representing Southwest-Netherlands region

SP main expertise relates to innovation systems analysis, life cycle analysis, foresight, energy systems analysis, policy and economics, and communication and process management. These competences are extended to research and development within, amongst others, the food and biotechnology area. In BioLinX, SP will use their expertise to assess the EU funded projects and classify them according to the level of support needed from BioLinX, support the analysis of the regions and implement the regional workshops

Lead for project analysis; representing South Sweden region

SC Sviluppo chimica S.p.A. is a service company totally owned by Federchimica, the Italian Federation of the Chemical Industry, that is a member of Confindustria, the General Confederation of the Italian Industry, and CEFIC, the European Chemical Industry Council. In BioLinX SC will enable the assessment of projects and enable the analysis of its own region, organize the regional events and will actively support the incubation process

Representing North-Italy as starting region; support project assessments and incubation

TNO (Strategy & Policy) use insights from innovation science, public administration and spatial and economic science. TNO has a strong footprint in regional analysis (technology / innovation system analysis). In BioLinX, TNO will use their expertise to support the assessments of the KBBE projects, set the pathway for analysis of the regions and implement reflective learning on the project to further improve the services offered.

Lead for reflective learning and regional analysis; support project assessments

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 652692
