Cees Oele
Project & Innovation manager

Worldwide Expertise for Food & Flowers

Who are we ?

- Leading consultancy SME on for agricultural production, the Core:
- Health, food safety, sustainability and the well-being of people
- Optimization in crop production by knowledge development and implementation

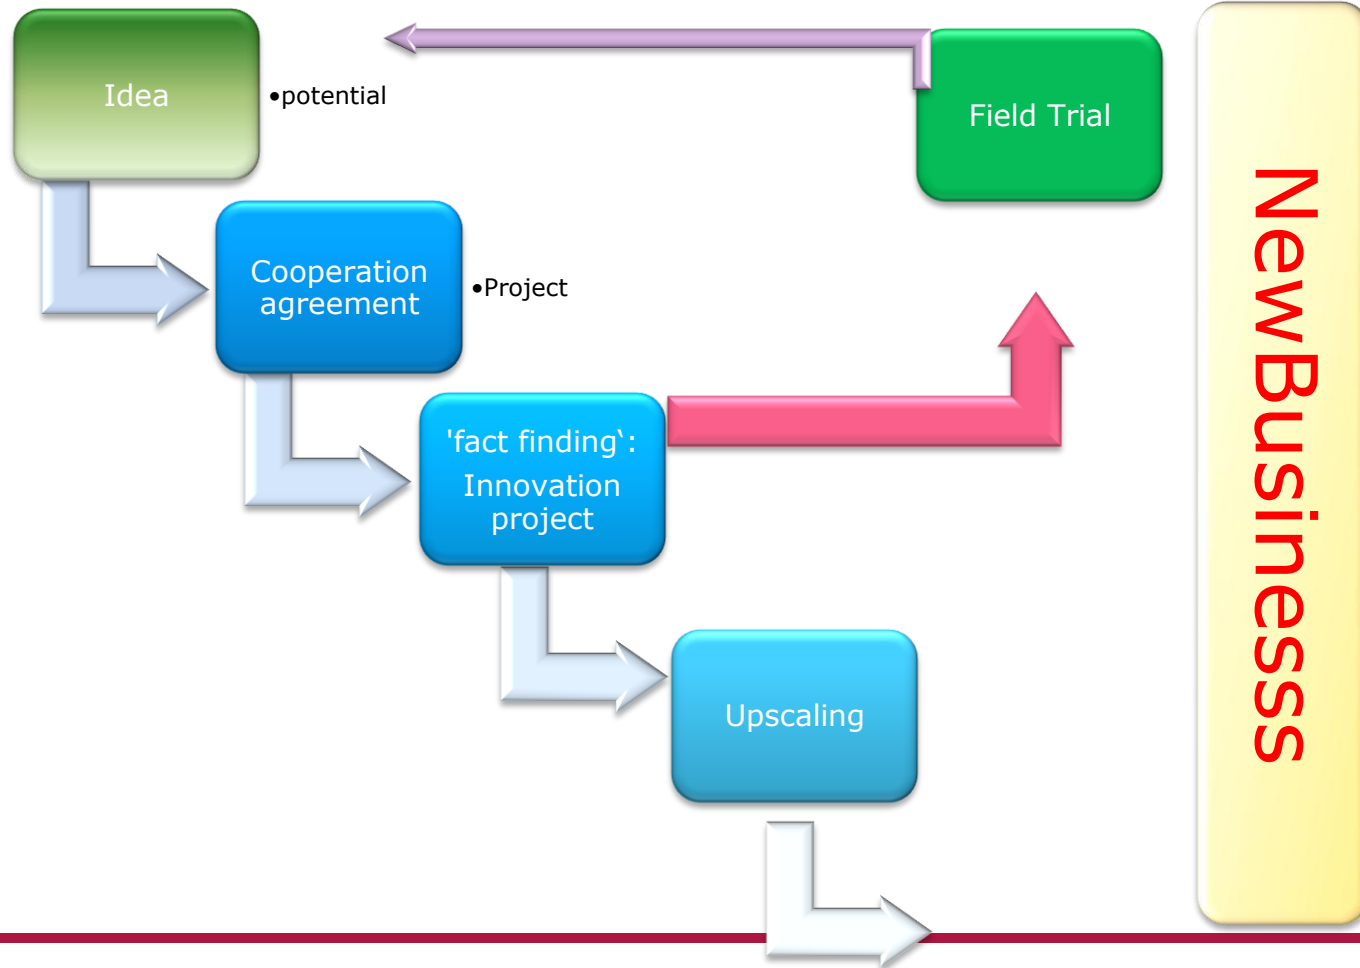

Activities

- Advising and training for growers, farmers, investors and breeders
- Implementing cultivation concepts
- Practical research: translation from know-how to use.
- Developing innovative ideas to projects and realize it, related to agricultural activities

The way to innovation

- Producers of food and flowers (fuels?) must innovate to sell their products or making new business, the ideas are there
- New opportunities are given in the Biobased Economy
- They lack the skills to refine their product or to organize it
- SME construction-enterprises do have those skills and know-how.
- Cooperation can lead to new Business, Delphy can organize it

Pathway:

Examples BIG

Rest streams

- Potato: from rest stream to main stream
- Market evaluation of components in sugar beet and sugar beet rest streams

Plant contents

- Proteins (soja, duckweed)
- Fatty acids
- Tanacetum
- Solanine

Examples

Greencrop protection:

- Woodvinegar from pyrolyses
- Blue acid from sorghum

Soilimprovement/Peatreplacement

- BioChar

Incinerators for low value biomass

Your example ?

Delphy can **organize** it and
can help with **funding**
