

Witteveen + Bos

BioLinX Brokerage Event

Freek Kramer, Anna Veldhoen 16 juni 2016

Who we are

- In general: consultancy and engineering
- Biobased activities:
 - Applied research
 - Bridge the gap between fundamental research and the real world
 - Initiate new ideas
 - Business development, business cases
 - Engineering

What we do

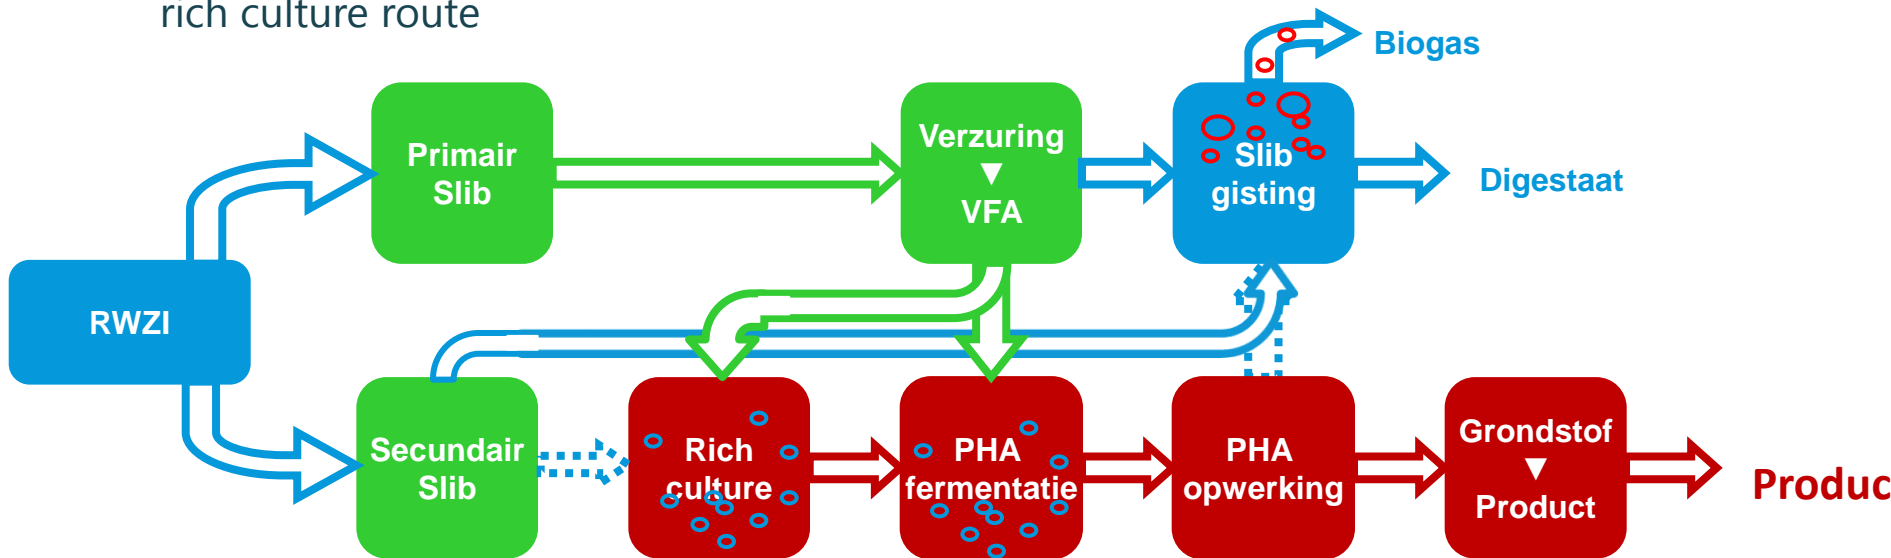

Our observations

- Products (cellulose, alginate , fatty acids, PHA – bioplastics, struvite)
- Market players (end users):
 - determine development and products
 - are not always willing to participate
- Bio-plastics: development/up scaling/cost reduction
- Water Science & Technology – Bioplastics production from sewage biomass, technology push or demand driven process?

Our request

PHA productie uit biomassa

rich culture route
